BigCommerce joins EU-US Data Privacy Framework

On 10 July 2023, the European Commission finalized an adequacy decision for the EU-US Data Privacy Framework ("DPF"), a voluntary framework that normalizes cross-border data transfers under GDPR. The European Commission concluded that the DPF provides an essentially equivalent level of protection under Article 45 GDPR and that recent changes in U.S. law adequately address concerns about government surveillance raised by the Court of Justice of the European Union in its Schrems II ruling.

As an existing EU-US Privacy Shield member, BigCommerce became a member of the DPF immediately upon effect of the European Commission's adequacy decision. Joining the DPF provides BigCommerce with a valid legal basis for US-bound data transfers and reflects BigCommerce's commitment to data transfer compliance.

Consistent with this commitment, BigCommerce intends to continue to adhere to the SCCs as well as the supplemental security measures articulated in the BigCommerce DPA and detailed at security.bigcommerce.com in addition to complying with DPF principles. Among other things, merchants that utilize our regional hosting capabilities will continue to be hosted primarily on our EU- or APAC-based infrastructure.
